DETAILED ACTION

This is a reply to the Applicant's amendment submitted on 03/29/2005. According to this amendment, claims 5, 14 and 27 are cancelled; and thus, claims 1-4, 6-13, 15-26 and 28-30 are currently presented in the instant application.

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative, Samuel W. Ntiros, on May 6th, 2005.

The Examiner's Amendment includes:

CLAIMS:

Claim 1, line 6, after "input signals" (at end of line) insert ", and wherein the first filter is coupled between the first components and the second filter is coupled between the second components";

Claim 10, line 2, after "input signals" (at end of line) insert "using a first filter coupled between the first components";

Line 3, after "input signals" insert "using a second filter coupled between the second components";

Claim 21, line 9, after “differential signals” (at end of line) insert “, and wherein the first filter is coupled between the first components and the second filter is coupled between the second components”;

Claim 28, line 9, after “differential signals” (at end of line) insert “, and wherein the first filter is coupled between the first components and the second filter is coupled between the second components.”.

Allowable Subject Matter

2. Claims 1-4, 6-13, 15-26 and 28-30 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest:

a) A circuit, in which a first filter is coupled between first components and a second filter is coupled between second components, in combination with the remaining claimed limitations, as called for in independent claims 1, 21 and 28; and

b) A method for generating a delayed signal including filtering first components of two differential input signals using a first filter coupled between the first components; and filtering second components of the differential input signals using a second filter coupled between the second components, in combination with the remaining claimed limitations, as called for in independent claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
